

Kerani - The Journey

"The Journey" saw its first light in 2007. Initially, it was a composition of merely four minutes which I put aside with the idea that some day, I just might elaborate on its powerful theme.

In 2009, a holiday in Switzerland inspired me to write "Voice of the Mountains" and "The Valley". I then understood that travel was to become the leitmotif of my second album.

The music on this album tells the story of everyone's journey; whether it is physical or emotional. It takes you to faraway places and countries you have more than likely seen in your dreams. Let your heart and imagination take from there.

I could not have possibly concluded this musical tale without wishing the traveller a magnificent and safe journey. Godspeed!
